

Jordan Investor Confidence Index

Update for the 3rd Quarter (Q3) of 2023

Confidence in the economy, monetary system, and the financial system is the driver of business fluctuations. When confidence increases, consumers and investors would want to buy and invest at prevailing market prices and vice versa.

Quantitatively, measuring changes in investor confidence is never easy. However, the Jordan Strategy Forum (JSF) measures confidence (quarterly) directly by assessing three pillars (and their sub-pillars). The pillars are the real economy, monetary system, and the financial system. The results are presented between 100 - 200 points.

Sub-Pillars of the Real Economy:

1. GDP growth rate.
2. Government budget (including grants).
3. Foreign Direct Investment inflows.
4. Manufacturing Quantity Production index.

Sub-Pillars of the Monetary System:

1. Foreign reserves held at Central Bank of Jordan.
2. Difference between the deposit interest rate of the Central Bank of Jordan and the Federal Reserve (Central Bank of the United States) rate.
3. Value of returned cheques.

Sub-Pillars of the Financial System:

1. Amman Stock Exchange (ASE) Weighted Stock Market Index.
2. Foreign investment in the ASE.
3. Growth in private sector credit.

The publication of this Index complements the JSF's efforts in promoting higher levels of investment in the Jordanian economy and its business environment.

For the technical reader, and if interested, the methodology is explained in the Forum's website.
